

TABLE OF CONTENTS

I FOUNDATIONS

1. Embryology	3
2. Teratogenesis	5
3. Cell Biology: Organelles	7
4. Cell Biology: Cytoskeleton	10
5. Cell Biology: Plasma Membrane	12
6. Cellular Suffering and Death	16
7. Inflammation	18
8. Extracellular Environment	20
9. Cellular Adaptations	22

II NEURO

1. Nervous System Basics	25
2. CNS Embryology	28
3. Cortex and Brain Vasculature	32
4. Vascular Events	36
5. Hypothalamus and Limbic System	38
6. Cranial Nerves part 1	41
7. Cranial Nerves part 2	44
8. Brainstem and Spinal Cord	47
9. Brainstem Lesions	52
10. CSF and ICP	57
11. Headache	60
12. Brain Tumors	64
13. Delirium and Dementia	66
14. Seizures	69
15. Spinal Cord Lesions	72
16. Movement	74
17. Basal Ganglia	78
18. Skeletal Muscle	80
19. Upper Extremity Nerves part 1	83
20. Upper Extremity Nerves part 2	88
21. Lower Extremity	92
22. Sensation	96
23. Eye	98
24. Ear	100
25. Sleep	103
26. Anesthetics	106

III PHARM BASICS

1. Parasympathetic Activation	111
2. Parasympathetic Inhibition	114
3. Sympathetic Activation	116
4. Sympathetic Inhibition	118
5. Neurotransmission	120
6. G Protein Second Messengers	123
7. Pharmacokinetics	126
8. Pharmacodynamics	131
9. Drug Metabolism	134
10. Drug Elimination	136
11. Drug Side Effects	140
12. Antidotes	144

TABLE OF CONTENTS

IV	CARDIOVASCULAR	
	1. Embryology	149
	2. Congenital Heart Defects	152
	3. Cardiac Output	158
	4. Heart Failure	160
	5. Treatment of CHF	162
	6. Edema and Shock	164
	7. Cardiac Cycle	167
	8. Diastolic Heart Murmurs	171
	9. Systolic Heart Murmurs	174
	10. Electrophysiology	177
	11. Antiarrhythmics	179
	12. Electrocardiography	182
	13. Arrhythmias	184
	14. Regulation of BP	189
	15. Hypertension	191
	16. Antihypertensives	193
	17. Atherosclerosis	196
	18. Antianginal Therapy and Lipid-Lowering Agents	199
	19. Myocardial Infarction part 1	201
	20. Myocardial Infarction part 2	204
	21. Cardiomyopathies and Endocarditis	206
	22. Other Cardiac Pathology	208
	23. Vasculitis	211
	24. Other Vascular Diseases	213
V	RHEUM & DERM	
	1. Bone Formation and Bone Tumors	217
	2. Bone Disorders	219
	3. Musculoskeletal Injuries	222
	4. Osteoarthritis and Rheumatoid Arthritis	225
	5. Other Types of Arthritis	227
	6. Systemic Disorders	229
	7. Dermatology part 1	232
	8. Dermatology part 2	235
VI	REPRODUCTION	
	1. Reproductive Anatomy	239
	2. Genital Embryology	241
	3. Androgens	243
	4. Testicular Pathology	245
	5. Penis and Prostate Pathology	247
	6. Female Reproductive Cycle	250
	7. Menstruation and Menopause	253
	8. Vulva, Vagina and Cervix	256
	9. Uterine Pathology	258
	10. Ovarian Pathology	260
	11. Ovarian Neoplasms	262
	12. Pregnancy part 1	265
	13. Pregnancy part 2	267
	14. Chromosomal Disorders	269
	15. Genetic Disorders: AD and Trinucleotide Repeats	271
	16. Genetic Disorders: AR and X-Linked	275
	17. Breast	279

TABLE OF CONTENTS

VII	MICRO	
	1. Bacterial Basics	285
	2. Bacterial Toxins	287
	3. Staphylococcus	289
	4. Streptococcus	291
	5. Other Gram-Positive Bacteria	293
	6. Gram-Negative Bacteria part 1	295
	7. Gram-Negative Bacteria part 2	297
	8. Spirochetes and Zoonotics	299
	9. Mycobacteria	301
	10. Nonstaining Bacteria	303
	11. Penicillins	305
	12. Cephalosporins	307
	13. Other Cell Wall Inhibitors	309
	14. Protein Synthesis Inhibitors	311
	15. Other Antibiotics	314
	16. Micro by Systems part 1	317
	17. Micro by Systems part 2	320
	18. Micro by Systems part 3	322
	19. Viral Basics	325
	20. DNA Viruses part 1	327
	21. DNA Viruses part 2	329
	22. RNA Viruses part 1	331
	23. RNA Viruses part 2	333
	24. HIV	336
	25. HIV Drugs	338
	26. Mycology part 1	341
	27. Mycology part 2	343
	28. Antifungals	345
	29. Protozoa	348
	30. Helminths and Ectoparasites	351
VIII	IMMUNOLOGY	
	1. Immune System Basics	355
	2. Antigen Presentation	357
	3. T Cells	359
	4. B Cells and Antibodies	361
	5. Immunization and Autoantibodies	363
	6. Hypersensitivity and Complement	366
	7. Macrophages, Granulocytes and Cytokines	368
	8. Immunosuppressants	370
	9. Immunodeficiencies	372
IX	GI	
	1. Oropharynx	379
	2. Esophagus	383
	3. Stomach	386
	4. Upper GI Pathology	388
	5. Duodenum	390
	6. Enterocytes and Absorption	392
	7. Diseases of the Small Intestine	394
	8. Large Intestine part 1	396
	9. Large Intestine part 2	398
	10. Large Intestine part 3	400
	11. Pancreas	402
	12. Liver Basics	404
	13. Alcoholic Liver Disease and Cirrhosis	406
	14. Liver Pathology	408
	15. Hepatitis	410
	16. Biliary Tract	414

TABLE OF CONTENTS

X	PULMONARY	
	1. Anatomy and Physiology	419
	2. Lung Volumes and Pulmonary Circulation	421
	3. Oxygen and Hemoglobin	424
	4. Oxygenation	426
	5. Ventilation and Perfusion	428
	6. Extreme Environments	430
	7. PE, DVT and Pneumothorax	433
	8. COPD and Asthma	435
	9. Pulmonary Medications	437
	10. Restrictive Lung Disease	439
	11. Lung Cancer	442
	12. Lung Infections	444
XI	MEDICINE IN SOCIETY	
	1. Research Study Designs	449
	2. Diagnostic Test Evaluation	451
	3. Interpretation of Study Data	454
	4. Study Validity	457
	5. Statistical Distribution and Error	460
	6. Biostatistics	462
	7. Disease Prevention and Public Health	464
	8. Healthcare System	468
	9. Ethics	474
XII	BIOCHEM	
	1. DNA Basics	479
	2. DNA Replication, Mutation and Repair	483
	3. RNA	486
	4. Protein Synthesis	490
	5. Inheritance	492
	6. Genetic Lab Techniques	495
	7. Glycolysis	498
	8. Gluconeogenesis	503
	9. Glycogen	506
	10. Energy Metabolism	509
	11. HMP Shunt and Other Sugars	513
	12. Starvation and Malnutrition	517
	13. Lipids	520
	14. Amino Acids and Nitrogen	523
	15. Amino Acid Disorders	525
	16. Minerals	527
	17. Fat-Soluble Vitamins and Antioxidants	529
	18. Water-Soluble Vitamins	531
XIII	PSYCH	
	1. Psychosis	535
	2. Antipsychotics	537
	3. Bipolar Disorder	540
	4. Depression	542
	5. Antidepressants	545
	6. Anxiety and Somatoform Disorders	547
	7. Eating Disorders	549
	8. Child Psych	551
	9. Ego Defense Mechanisms and Personality Disorders	553
	10. Alcohol Abuse	555
	11. Substance Abuse	558

TABLE OF CONTENTS

XIV	RENAL	
	1. Renal Embryology and Anatomy	563
	2. Glomerular Physiology	565
	3. Nephron Physiology	567
	4. Diuretics	572
	5. Electrolyte Disorders	574
	6. Acid-Base Disorders	576
	7. Nephritis	578
	8. Nephrosis	580
	9. Renal Failure	582
	10. Other Urinary Pathology	586
XV	PEDIATRICS	
	1. Pediatric Review	593
XVI	ENDOCRINE	
	1. Endocrine Overview	599
	2. Pituitary	601
	3. Adrenal Steroid Synthesis	605
	4. Cushing Syndrome	608
	5. Hyperaldosteronism and Adrenal Insufficiency	610
	6. Adrenal Medulla	612
	7. Hypothyroidism	614
	8. Hyperthyroidism	616
	9. Thyroid Cancer	618
	10. Diabetes	620
	11. Diabetic Emergencies	622
	12. Diabetes Drugs	624
	13. Obesity	627
	14. Calcium Metabolism	629
XVII	HEME	
	1. Clotting Factors	635
	2. Anticoagulant Drugs	637
	3. RBC Basics	639
	4. Erythropoiesis	641
	5. Microcytic Anemia	643
	6. Macrocytic and Normocytic Anemia	645
	7. Hemolytic Anemia	647
	8. Platelet Function	650
	9. Platelet Disorders	652
	10. Lymphoma	654
	11. Leukemias	656
	12. Multiple Myeloma	659
XVIII	ONCOLOGY	
	1. Cancer Basics	663
	2. Genetics of Cancer	665
	3. Cancer Risk Factors	668
	4. Cancer Screening and Prevention	670
	5. Cancer Drugs part 1	672
	6. Cancer Drugs part 2	674
