

# TABLE OF CONTENTS

---

## I FOUNDATIONS

1. Embryology	3
2. Teratogenesis	6
3. Cell Biology: Organelles	8
4. Cell Biology: Cytoskeleton	11
5. Cell Biology: Plasma Membrane	13
6. Cellular Suffering and Death	17
7. Inflammation	19
8. Extracellular Environment	21
9. Cellular Adaptations	24

## II NEURO

1. Nervous System Basics	29
2. CNS Embryology	32
3. Cortex and Brain Vasculature	36
4. Vascular Events	40
5. Hypothalamus and Limbic System	42
6. Cranial Nerves part 1	45
7. Cranial Nerves part 2	49
8. Brainstem and Spinal Cord	53
9. Brainstem Lesions	58
10. CSF and ICP	63
11. Headache	66
12. Brain Tumors	70
13. Delirium and Dementia	72
14. Seizures	75
15. Spinal Cord Lesions	78
16. Movement	80
17. Basal Ganglia	84
18. Skeletal Muscle	86
19. Upper Extremity Nerves part 1	90
20. Upper Extremity Nerves part 2	95
21. Lower Extremity	99
22. Sensation	103
23. Eye	105
24. Ear	107
25. Sleep	110
26. Anesthetics	113

## III PHARM BASICS

1. Parasympathetic Activation	119
2. Parasympathetic Inhibition	122
3. Sympathetic Activation	124
4. Sympathetic Inhibition	126
5. Neurotransmission	128
6. G Protein Second Messengers	132
7. Pharmacokinetics	135
8. Pharmacodynamics	140
9. Drug Metabolism	143
10. Drug Elimination	146
11. Drug Side Effects	150
12. Antidotes	154

# TABLE OF CONTENTS

---

IV	CARDIOVASCULAR	
	1. Embryology	159
	2. Congenital Heart Defects	162
	3. Cardiac Output	168
	4. Heart Failure	172
	5. Treatment of CHF	174
	6. Edema and Shock	177
	7. Cardiac Cycle	180
	8. Diastolic Heart Murmurs	184
	9. Systolic Heart Murmurs	187
	10. Electrophysiology	190
	11. Antiarrhythmics	192
	12. Electrocardiography	195
	13. Arrhythmias	197
	14. Regulation of BP	202
	15. Hypertension	204
	16. Antihypertensives	206
	17. Atherosclerosis	209
	18. Antianginal Therapy and Lipid-Lowering Agents	212
	19. Myocardial Infarction part 1	214
	20. Myocardial Infarction part 2	217
	21. Cardiomyopathies and Endocarditis	219
	22. Other Cardiac Pathology	221
	23. Vasculitis	224
	24. Other Vascular Diseases	226
V	RHEUM AND DERM	
	1. Bone Formation and Bone Tumors	231
	2. Bone Disorders	233
	3. Musculoskeletal Injuries	236
	4. Osteoarthritis and Rheumatoid Arthritis	239
	5. Other Types of Arthritis	242
	6. Systemic Disorders	246
	7. Dermatology part 1	249
	8. Dermatology part 2	252
VI	REPRODUCTION	
	1. Reproductive Anatomy	259
	2. Genital Embryology	261
	3. Androgens	263
	4. Testicular Pathology	265
	5. Penis and Prostate Pathology	267
	6. Female Reproductive Cycle	271
	7. Menstruation and Menopause	275
	8. Vulva, Vagina, and Cervix	278
	9. Uterine Pathology	280
	10. Ovarian Pathology	282
	11. Ovarian Neoplasms	284
	12. Pregnancy part 1	287
	13. Pregnancy part 2	290
	14. Chromosomal Disorders	292
	15. Genetic Disorders: AD and Trinucleotide Repeats	296
	16. Genetic Disorders: AR and X-Linked	301
	17. Breast	305

# TABLE OF CONTENTS

---

VII	MICRO	
	1. Bacterial Basics	311
	2. Bacterial Toxins	314
	3. Staphylococcus	317
	4. Streptococcus	319
	5. Other Gram-Positive Bacteria	321
	6. Gram-Negative Bacteria part 1	323
	7. Gram-Negative Bacteria part 2	325
	8. Spirochetes and Zoonotics	327
	9. Mycobacteria	329
	10. Nonstaining Bacteria	331
	11. Penicillins	333
	12. Cephalosporins	335
	13. Other Cell Wall Inhibitors	337
	14. Protein Synthesis Inhibitors	339
	15. Other Antibiotics	342
	16. Micro by Systems part 1	345
	17. Micro by Systems part 2	349
	18. Micro by Systems part 3	351
	19. Viral Basics	354
	20. DNA Viruses part 1	356
	21. DNA Viruses part 2	358
	22. RNA Viruses part 1	360
	23. RNA Viruses part 2	362
	24. HIV	365
	25. HIV Drugs	368
	26. Mycology part 1	371
	27. Mycology part 2	373
	28. Antifungals	375
	29. Protozoa	378
	30. Helminths and Ectoparasites	381
VIII	IMMUNOLOGY	
	1. Immune System Basics	385
	2. Antigen Presentation	387
	3. T Cells	389
	4. B Cells and Antibodies	391
	5. Immunization and Autoantibodies	393
	6. Hypersensitivity and Complement	396
	7. Macrophages, Granulocytes, and Cytokines	399
	8. Immunosuppressants	401
	9. Immunodeficiencies	403
IX	GI	
	1. Oropharynx	411
	2. Esophagus	415
	3. Stomach	418
	4. Upper GI Pathology	420
	5. Duodenum	422
	6. Enterocytes and Absorption	424
	7. Diseases of the Small Intestine	426
	8. Large Intestine part 1	428
	9. Large Intestine part 2	430
	10. Large Intestine part 3	432
	11. Pancreas	434
	12. Liver Basics	436
	13. Alcoholic Liver Disease and Cirrhosis	438
	14. Liver Pathology	440
	15. Hepatitis	442
	16. Biliary Tract	446

# TABLE OF CONTENTS

---

X	PULMONARY	
	1. Anatomy and Physiology	451
	2. Lung Volumes and Pulmonary Circulation	453
	3. Oxygen and Hemoglobin	456
	4. Oxygenation	458
	5. Ventilation and Perfusion	460
	6. Extreme Environments	462
	7. PE, DVT, and Pneumothorax	465
	8. COPD and Asthma	467
	9. Pulmonary Medications	469
	10. Restrictive Lung Disease	471
	11. Lung Cancer	474
	12. Lung Infections	477
XI	MEDICINE IN SOCIETY	
	1. Research Study Designs	483
	2. Diagnostic Test Evaluation	485
	3. Interpretation of Study Data	488
	4. Study Validity	491
	5. Statistical Distribution and Error	494
	6. Biostatistics	496
	7. Disease Prevention and Public Health	498
	8. Healthcare System	502
	9. Ethics	508
XII	BIOCHEM	
	1. DNA Basics	513
	2. DNA Replication, Mutation, and Repair	517
	3. RNA	520
	4. Protein Synthesis	524
	5. Inheritance	526
	6. Genetic Lab Techniques	529
	7. Glycolysis	532
	8. Gluconeogenesis	537
	9. Glycogen	540
	10. Energy Metabolism	543
	11. HMP Shunt and Other Sugars	547
	12. Starvation and Malnutrition	551
	13. Lipids	554
	14. Amino Acids and Nitrogen	557
	15. Amino Acid Disorders	559
	16. Minerals	561
	17. Fat-Soluble Vitamins and Antioxidants	563
	18. Water-Soluble Vitamins	565
XIII	PSYCH	
	1. Psychosis	569
	2. Antipsychotics	571
	3. Bipolar Disorder	574
	4. Depression	576
	5. Antidepressants	579
	6. Anxiety and Somatoform Disorders	581
	7. Eating Disorders	583
	8. Child Psych	585
	9. Ego Defense Mechanisms and Personality Disorders	587
	10. Alcohol Abuse	589
	11. Substance Abuse	592

# TABLE OF CONTENTS

---

XIV	RENAL	
	1. Renal Embryology and Anatomy	597
	2. Glomerular Physiology	599
	3. Nephron Physiology	601
	4. Diuretics	607
	5. Electrolyte Disorders	609
	6. Acid-Base Disorders	611
	7. Nephritis	613
	8. Nephrosis	615
	9. Renal Failure	617
	10. Other Urinary Pathology	621
XV	PEDIATRICS	
	1. Pediatric Review	627
XVI	ENDOCRINE	
	1. Endocrine Overview	635
	2. Pituitary	638
	3. Adrenal Steroid Synthesis	642
	4. Cushing Syndrome	645
	5. Hyperaldosteronism and Adrenal Insufficiency	648
	6. Adrenal Medulla	651
	7. Hypothyroidism	653
	8. Hyperthyroidism	658
	9. Thyroid Cancer	662
	10. Diabetes	664
	11. Diabetic Emergencies	666
	12. Diabetes Drugs	668
	13. Obesity	671
	14. Calcium Metabolism	674
XVII	HEME	
	1. Clotting Factors	679
	2. Anticoagulant Drugs	681
	3. RBC Basics	683
	4. Erythropoiesis	685
	5. Microcytic Anemia	687
	6. Macrocytic and Normocytic Anemia	689
	7. Hemolytic Anemia	691
	8. Platelet Function	694
	9. Platelet Disorders	696
	10. Lymphoma	698
	11. Leukemias	700
	12. Multiple Myeloma	703
XVIII	ONCOLOGY	
	1. Cancer Basics	707
	2. Genetics of Cancer	709
	3. Cancer Risk Factors	712
	4. Cancer Screening and Prevention	714
	5. Cancer Drugs part 1	716
	6. Cancer Drugs part 2	718
